INTRODUCTION

This document is intended to provide a general overview of statistics pertaining to Chesapeake's physical growth, and includes information regarding demographics, economics, and development of land at both the Citywide and Planning Area level.

The City of Chesapeake was formed in 1963 through the consolidation of the City of South Norfolk and Norfolk County. The City is comprised of 353 square miles and is located in the southeastern portion of the Commonwealth of Virginia in the Hampton Roads region. Chesapeake is bordered to the north by the Cities of Norfolk and Portsmouth, to the east by the City of Virginia Beach, to the south by Currituck and Camden Counties in North Carolina, and to the west by the City of Suffolk.

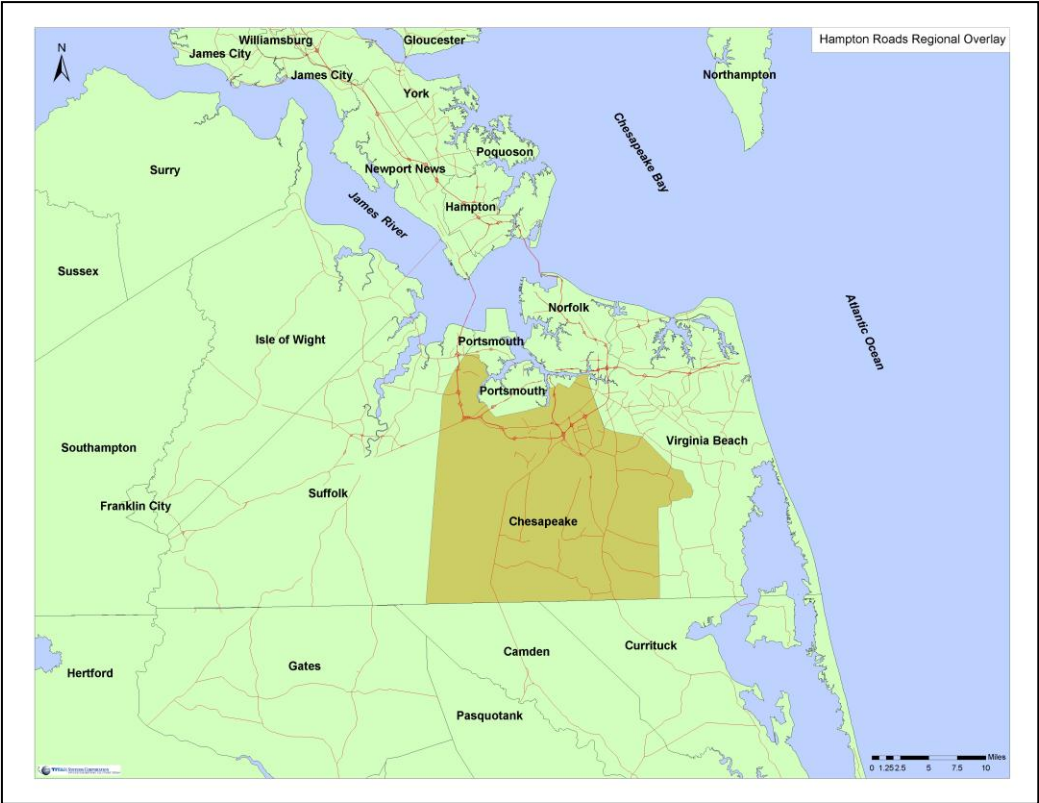

The merger between the City of South Norfolk and Norfolk County has resulted in a unique variety of landscapes within the City. Residents and businesses interested in locating in Chesapeake may choose between urban, suburban, and rural environments. The former City of South Norfolk has retained its urban character while the southernmost reaches of the City have remained rural. Between the two extremes lies a rapidly developing suburban region, offering a variety of amenities and housing options.

Chesapeake is centrally located in the South Hampton Roads area and is well linked to the rest of the region through an extensive transportation system. Several major interstate highways facilitate easy travel within the City and throughout the region. Chesapeake is also accessible by water through the Southern and Western Branches of the Elizabeth River and the Intracoastal Waterway. Chesapeake also has two airfields and numerous railways to add to the versatility of the strategic transportation network.

Chesapeake has experienced considerable population and economic growth since its creation. The City had an estimated January 2010 population of 226,995, which is 190% greater than the 1963 population of 78,153. The Hampton Roads Planning District Commission estimates that the City's population will increase another 27% by the year 2034 with a projected population of roughly 313,600. The City is undertaking an update of its 2026 Comprehensive Plan as a policy guide for the City's future development to the year 2030. The City Council also adopted a Level of Service policy and other growth management tools to facilitate the orderly development of the City's available land resources.

For planning purposes, Chesapeake is composed of nine Planning Areas: Camelot, Deep Creek, Great Bridge, Greenbrier, Indian River, Rivercrest, Southern Chesapeake, South Norfolk, and Western Branch. The majority of new development is occurring in the Greenbrier, Great Bridge, and Rivercrest areas.

Additional information related to the Comprehensive Plan update and U.S. Census data may be obtained on the Chesapeake Planning Department's web site at www.CityofChesapeake.net/services/depart/planning/index.shtml.

JANUARY 2010 POPULATION ESTIMATE SUMMARY

Over the past year, 789 new residential Certificates of Occupancy (CO's) were issued. During that same time, there were 67 residential demolitions. The result is a net 722 new dwelling units. Based on net new dwelling units, average household sizes and current vacancy rates, **the City's estimated population as of January 1, 2010 is 226,995 persons.** The January 1, 2009 population estimate was 225,255.

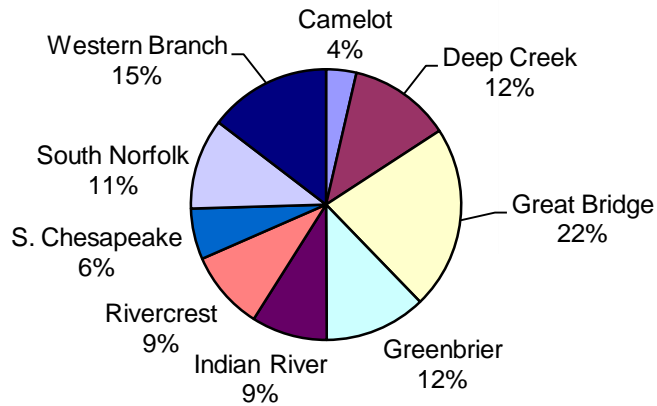

The above estimate represents a net increase of 1,740 persons and a 0.77% population rate of change between January 1, 2009 and January 1, 2010. The 0.77% figure marks a decrease from the 1.2% average annual growth rate that has occurred over the past decade (1999-2009), but is an increase from last year's rate (0.68%). The greatest increase in population during the current period occurred in the Greenbrier Planning Area. This resulted from a significant number of condominium CO's being issued along the Kempsville Road corridor (Census Tracts 208.04, 208.06).

While the Great Bridge Planning Area continues to comprise the largest percentage of the City's population (21.97%), its share dropped slightly in the last year, whereas the Deep Creek and Greenbrier Planning Areas experienced population share increases.

Between 1985 and 1995, the City's average annual growth rate was 3.2%, the highest growth period in the City's history.

The City's growth rate has declined significantly since 1995, with an average annual growth rate of 1.19% between 2000 and 2010.

Total Population Change, 1970-2010: 137,415 (153%)

Note: All figures are Chesapeake Planning Department January 1 population estimates except for 1970, 1980, 1990, and 2000, which were Census years. The U.S. Census Bureau and the City of Chesapeake use different methodologies for estimating population. Therefore, the negative change occurring between 1989 and 1990 reflects a difference in method, not an actual population decrease.

Population and Housing Narrative Profile: 2008
2008 American Community Survey**

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

HOUSEHOLDS AND FAMILIES: In 2008 there were 80,000 households in Chesapeake city. The average household size was 2.7 people.

Families made up 76 percent of the households in Chesapeake city. This figure includes both married-couple families (57 percent) and other families (19 percent). Nonfamily households made up 24 percent of all households in Chesapeake city. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

NOTE. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see <http://www.census.gov/acs/www/Downloads/ACS/accuracy2006.pdf> Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Notes:

- For more information on understanding race and Hispanic origin data, please see the Census 2000 Brief entitled, <http://www.census.gov/prod/2001pubs/c2kbr01-1.pdf> Overview of Race and Hispanic Origin, issued March 2001. (pdf format)
- While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Appendix A: Glossary of Terms

Glossary of Terms

- Census Tract:** A census tract is the fundamental geographic unit from which census data is collected. Chesapeake is composed of thirty-eight census tracts. Census tracts are further subdivided into block groups and blocks; information at these levels is not provided in this document.
- Condominium:** A form of property ownership providing for individual ownership of space in a structure or development, together with an individual interest in the land or other parts of the structure/development held in common with other owners.
- Duplex:** A building designed as a single structure, containing two separate living units, each of which is designed to be occupied as a separate, independent residence for one family.
- Family:** As defined for census purposes, a family is a householder plus one or more persons living in the same household and related by either marriage, blood, or adoption.
- Group Home:** A group home is a residence for people not living in households. A group may be a nursing home, hospital, dormitory, half-way house, shelter, or an institution such as a correctional facility.
- Household:** A household refers to people within a housing unit, where as a housing unit refers to an actual structure. Only occupied housing units are considered a household. Persons who live in a group home are not considered to live in households.
- Median:** The term median is a statistical term referring to the midpoint in a series. One-half of all observations will fall above and below the median.
- Mobile Home:** A mobile home is a transportable structure intended as living quarters and is designed to be used with or without a permanent foundation.
- Per Capita:** Per capita is a unit of measure which is equivalent to the equal division of something among all persons.
- Planning Area:** A planning area is a geographic unit used for planning and data collection purposes. Chesapeake is composed of nine planning areas. Census tracts aggregate into planning areas.

PUD: An acronym that stands for Planned Unit Development, an area for which a unitary development plan has been prepared, indicating, but not being limited to, the following land uses: open space, on-site circulation for both pedestrians and vehicles, parking, setbacks, housing densities, landscaping, etc.

Rezoning: An amendment to the zoning ordinance. Ordinarily, rezonings can take three forms: 1) a comprehensive revision or modification to the zoning text and map; 2) a text change in zone requirements; and 3) a change in the map (e.g. an area zoned for residential use is rezoned for commercial use). Applications for rezonings are reviewed by the locality's planning staff and planning commission. After receiving a recommendation from the planning commission and holding a public hearing, the local governing body may approve or disapprove the rezoning request.

Site Plan: A plan, drawn to scale, showing uses and structures proposed for a parcel of land as required by the regulations. Includes lot lines, streets, building sites, reserved open space, buildings, major landscape features – both natural and man-made – and depending on the requirements, the locations of proposed utility lines.

Subdivision: The division or redivision of a lot, tract, or parcel of land by any means into two or more lots, tracts, parcels, or other divisions of land, including changes in existing lot lines for the purpose – whether immediate or future – of lease, transfer, or ownership, or building or lot development.
